SMITH RESIDENCE

Wellesley, MA

Residence Renovation

Private Residence| Contributed as the Prime Designer | 2020-2022
SD-DD-CD

Smith Residence is a property that Reed Hilderbrand has been working on for over 10 years. The client would like to see a renovation for both the building and the landscape area. All areas of the landscape portion of the properties have been renovated, and a new pool design also comes with this project.

SOHO FARMHOUSE

Rhinebeck, NY

Grasmere Farm Preservation
Hospitality| Contributed as Designer | 2020

Grasmere Farm is envisioned as a hospitality project that preserves the National Historic landmark of the Grasmere estate, c. 1774, while creating a vital and sustainable property for our time. The proposed plan pursues a preservation approach of landscape rehabilitation, integrating new uses within the site's natural systems and cultural artefacts that reflect two centuries of use as estate, pleasure ground, and farm. Located just south of the Village of Rhinebeck NY, the site is notably the Town's first "country seat" estate. The Grasmere Farm project will build upon these recent stabilizing efforts as it both honors and continues the property's rich heritage. Guests and visitors will learn of the site's heritage and experience its unique offerings – a rural retreat with farm to table food and locally sourced goods, exemplifying environmentally sensitive farming and landscape maintenance practices.

Marsh Court Garden

England

Residence Garden

Private Residence| Contributed as Designer | 2020

In 2010 the owners of Marshcourt commissioned Reed Hilderbrand to develop a master plan for the preservation and interpretation of its landscape. Originally encompassing 1300 acres outside of the village of Stockbridge in Hampshire, England, the property is situated along the edge of the Test River valley within a rolling terrain of hedgerow-lined fields. Designed by architect Edwin Lutyens for the financier Herbert Johnson, Marshcourt was constructed between 1901 and 1904, with a major addition between 1924 and 1926. It is a celebrated work of architecture and landscape design from the early twentieth century, and it stands as a quintessential expression of the Arts and Crafts Movement in Britain.

Thinned Clump, take out hedge

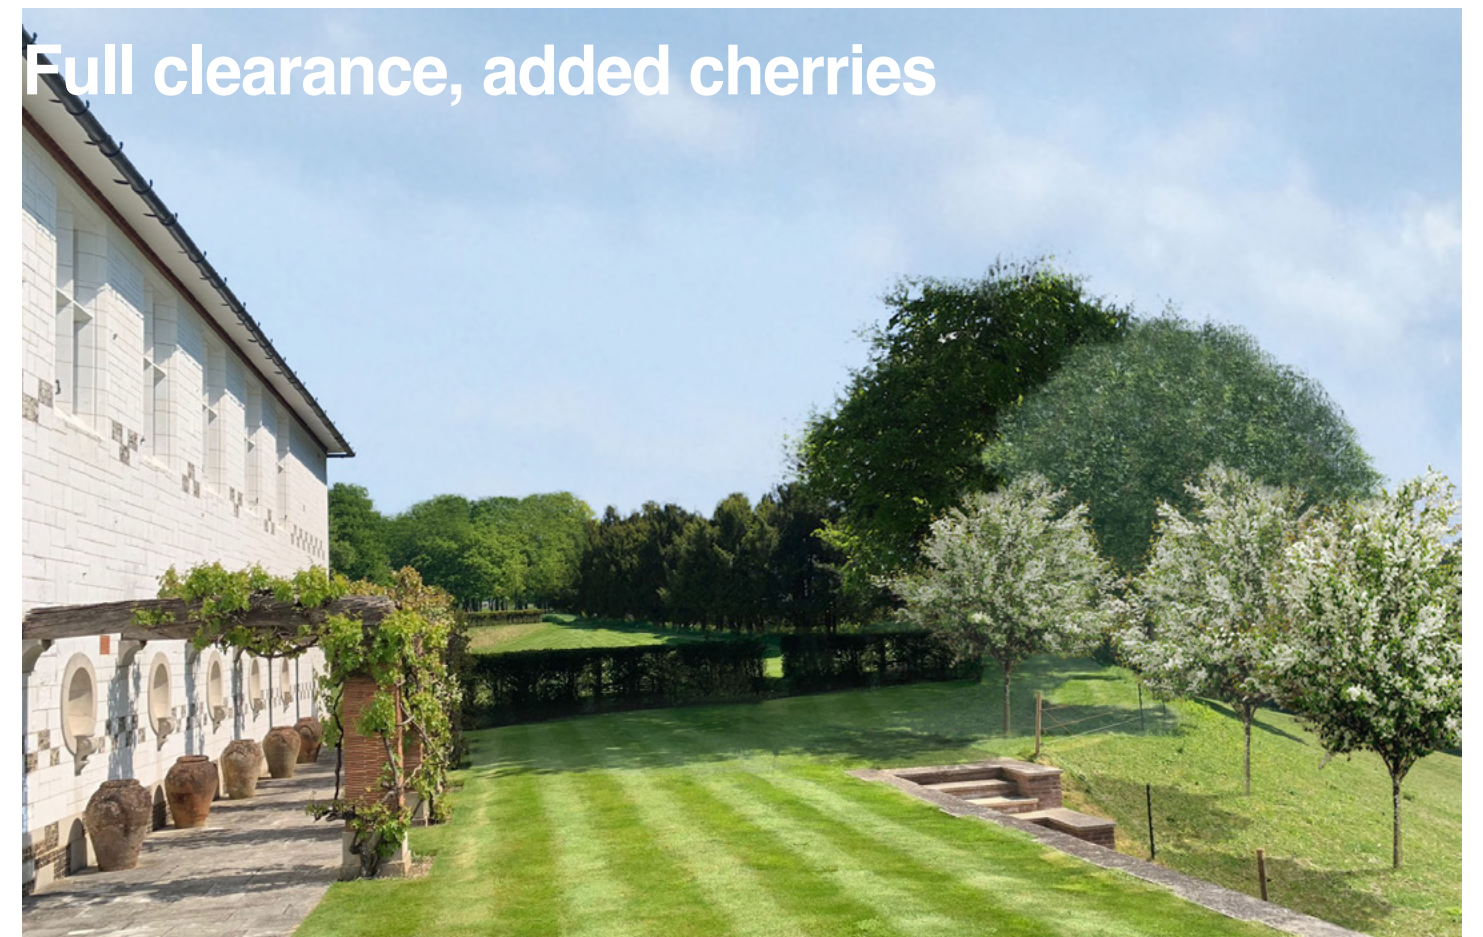

Thinned Clump

Full clearance, added cherries

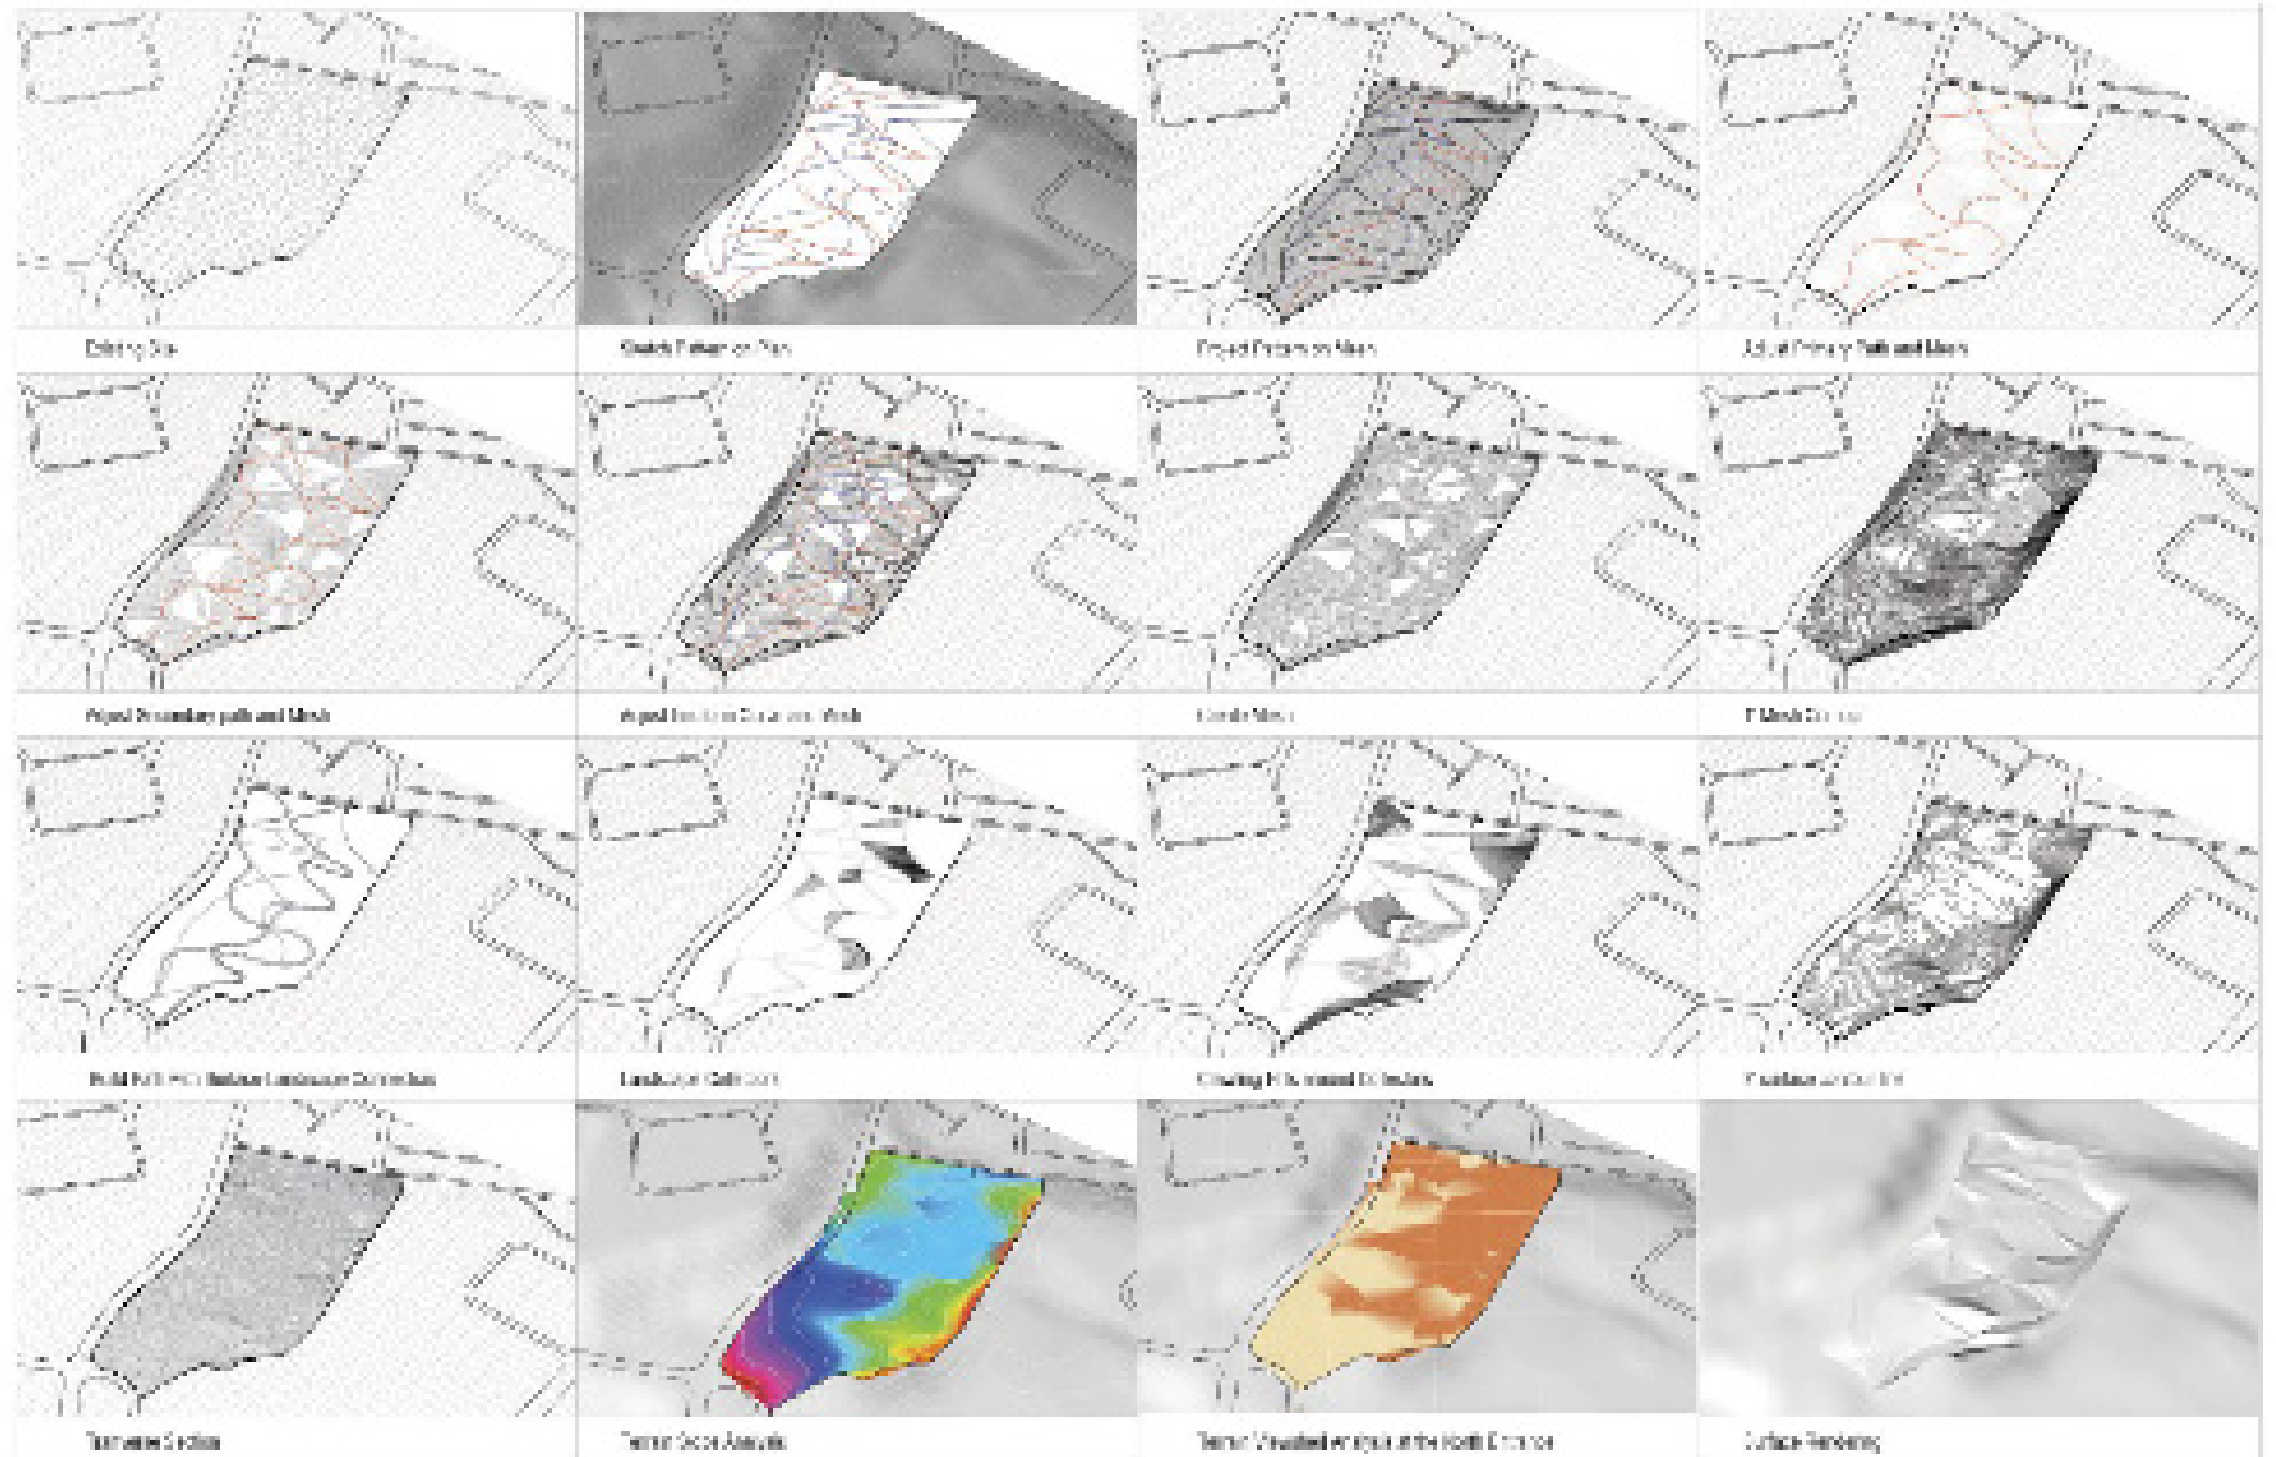

Nurb Surfacing

Rhino, Grasshopper, Rhino Terrain

This project develops a playscape built upon a geometric foundation, manipulated, scaled and augmented the geometric diagram to develop the organizational layout in response to the site conditions and context.

3D Modeling & Rendering

SMA Group, Laguna Beach

As the intern at SMA Group, I used CAD, Rhino, SketchUp, Lumion to generate rendering for Urban Agile Urban Design Project.

In this project, Meadow Garden, Entrance Water Features, and Trellis Details are all designed to create a pleasant sensory experience in this urban design project.
